

Security Awareness Training

HIPAA Breach Prevention Platform (BPP)

Our Most Comprehensive HIPAA Compliance Cybersecurity Solution.

- Annual HIPAA Training
- Annual Cybersecurity Training
- Weekly Micro-trainings
- Pre-built HIPAA Policies and Procedures
- Dark Web Monitoring
- Simulated Phishing
- Annual HIPAA Risk Assessment
- Microsoft & Google Security Training
- Microsoft Productivity Trainings
- Catch-Phish Outlook plug-in

Meeting Compliance with the BPP

CONTINUOUS CYBERSECURITY EDUCATION

Many cybersecurity regulations require some form of formalized cybersecurity training program. The BPP offers an annual cybersecurity training class along with weekly micro-trainings to test user's cybersecurity knowledge. The BPP also includes simulated phishing to provide realistic phishing testing of users.

POLICIES AND PROCEDURES/TEMPLATE DOCUMENTS

Cybersecurity regulations require organizations to have documented cybersecurity policies and procedures, what is specifically required depends on the specific regulation. The BPP contains base level documentation that is common across many regulations, and these provide a good jump start the creation of your cybersecurity policies and procedures.

SECURITY RISK ASSESSMENT (SRA)

Performing an SRA is a requirement for most cybersecurity related regulations. The BPP has a built-in SRA, based on NIST SP 800-30, an industry standard publication that serves as a guide for performing a risk assessment. Our SRA report identifies weaknesses and potential vulnerabilities within your organization. It also provides you with a work plan to track progress of improvements made towards those identified items.

HIPAA Compliance

Stand-alone HIPAA service with core compliance requirements.

- Annual HIPAA Training
- Annual Cybersecurity Training
- Pre-built HIPAA Policies and Procedures
- Annual HIPAA Risk Assessment

EVA MD

Continuous Cyber Security Training Program that meets HIPAA training Requirements.

- Annual HIPAA Training
- Annual Cybersecurity Training
