

Breach Prevention Platform (BPP)

Our most comprehensive service, BPP mitigates Human Security risks, identifies Cybersecurity risks, and meets Compliance Requirements for State Data Security laws by aligning with a “Reasonable Cybersecurity Program” required by most states.

This continuous security program is the all-in-one solution built to establish ongoing security practices for every user and is powered by our Employee Vulnerability Assessment (EVA), Simulated Phishing, Dark Web Monitoring, and Annual Risk Assessment.

HIPAA BPP

HIPAA compliance and cybersecurity go hand-in-hand with this program. For anyone in healthcare who wants to go above and beyond the basic annual HIPAA compliance requirements and also include all the ongoing cyber-security awareness training benefits included with our Breach Prevention Platform. Featuring all of the cybersecurity features available in the Breach Prevention Platform plus HIPAA Privacy & Security Training, an Annual HIPAA Risk Assessment and 18 HIPAA Policy and Procedure Templates.

EVA MD

This robust healthcare cybersecurity solution identifies human security risks with EVA and meets the annual HIPAA training requirement with our HIPAA Privacy & Security course. Featuring HIPAA Privacy & Security Training and including Dark Web Monitoring, Simulated Phishing, Employee Vulnerability Assessments and Weekly Micro Trainings. This program is a good mix for most healthcare organizations who want to ensure they have HIPAA and Security trainings for users.

HIPAA Compliance

A standalone HIPAA service with core compliance requirements. Good for anyone in healthcare who just needs to meet their annual minimum HIPAA compliance requirements or is already using another cybersecurity user training application. This is a standalone HIPAA compliance service and does not include any continuous training elements or cybersecurity services.
