# TrustUC with Webex

## CONNECT. INTEGRATE. COLLABORATE.

A communications and collaboration app for calling, messaging, and meeting with anyone, from any device, in a single easy-to-use cloud application.

## AI-Powered Communication & Collaboration

TrustUC elevates teamwork, maximizes productivity, and enhances collaboration for every work style. Call, chat, meet, message, whiteboard, and host webinars and events through a seamless and consistent communication experience on any device.

With a focus on security and advanced AI features, TrustUC includes integrated employee Security Awareness Training and cutting-edge Business Messaging functionality for both internal and customer interactions.

### TrustUC with Webex

**Built-In Security**
Protect your teams' data and privacy with enterprise-grade security built-in from the ground up. Our additional Security Awareness Training integration educates your team on the intricacies of protecting your business from cyber threats such as spam, phishing, malware, ransomware, social engineering and more through continuous cybersecurity education.
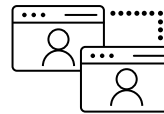

**Enhanced Messaging**
Telesystem Business Messaging, included in all TrustUC seats, not only enables SMS and MMS capabilities, but also supports a variety of operational needs from marketing automation to customer service inquiries, leveraging intelligent AI to streamline interactions and boost customer satisfaction.

### Call
Powerful calling that brings your team and customers together, on any device, from anywhere in the world.

### Meet
Create engaging meetings that bring everyone together, no matter their location, language or communication style.

### Chat
Keep work flowing with rich messaging, secure file sharing, and whiteboarding for both internal and external teams, in the same space.

### Business Messaging
Utilize P2P and bulk messaging, automated responses, SMS marketing campaigns and deliver 24/7 customer support via a customized AI assistant.

### Security
Utilize our built-in Employee Security Awareness training platform, dark web monitoring, phishing simulations, and yearly NIST security audits to turn your employees into the strongest defense in your cybersecurity playbook.

### AI Assistant
Cutting-edge AI features such as intelligent message summaries, meeting highlights, and automatic transcriptions to help streamline communication, increase productivity, and ensure you never miss important details.
